**THIS MACHINE CHANGES
HOW YOU SEE THE WORLD**

SO DOES GRATITUDE

2020 has been...interesting.

I can vividly remember sitting at a table during a networking event in January as we each shared a word that summed up our intentions for the year. Mine was “growth.” I had just signed papers to expand Date-Line Digital Printing into an adjacent space in our strip mall so we could install a massive new flatbed printer, and I was focused on how to leverage the additional space and the new capabilities of the printer to grow our revenue and do new and exciting things in 2020.

You might know what came next.

The time spent devising a plan to grow and conquer was quickly replaced with time spent devising a plan to survive. The uncertainty (easily my least favorite buzzword of the year) of those first few months of the pandemic deflated my dreams of growing and I found myself in survival mode.

Except along the way I was constantly aware of the patience and generosity of our vendors, our landlord, our customers, and my staff. It was impossible to fully grasp and as the pages of the calendar evaporated – and we were still here – I found myself overwhelmed with thankfulness over and over again.

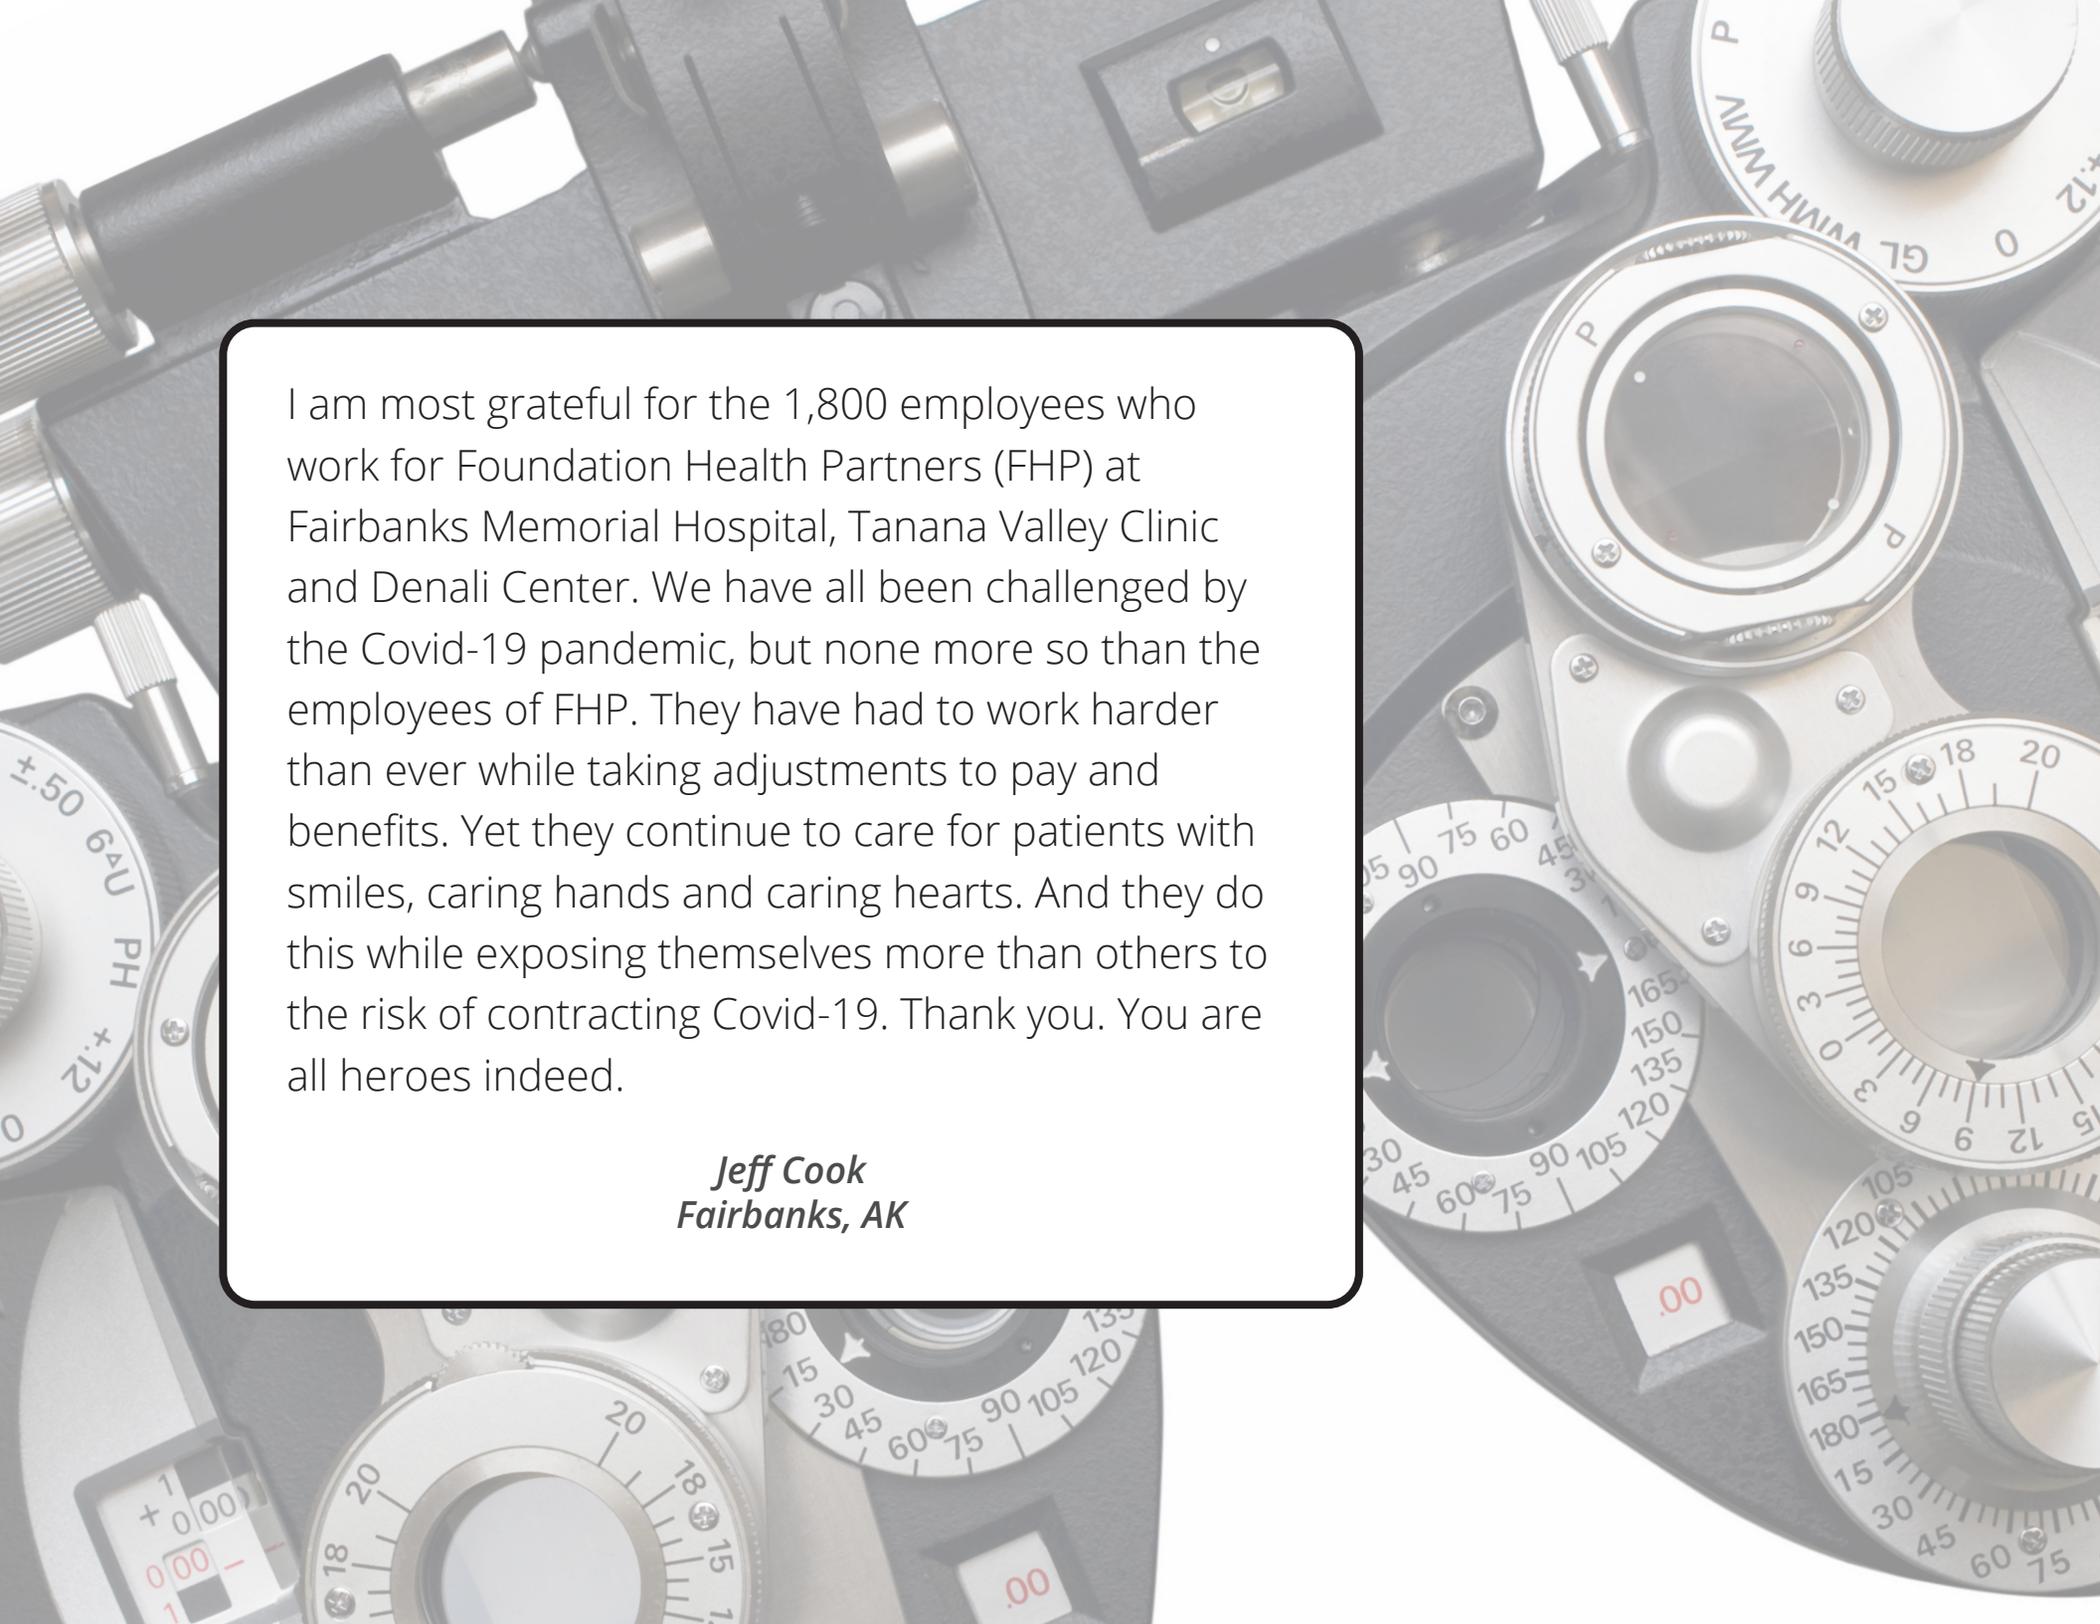

As I write this Date-Line is still not whole, but I am grateful nonetheless because in a year where so many things went wrong, there were still an awful lot of really wonderful things happening if you looked for them.

And that is what this book is for: to drop a few breadcrumbs to help you find your way back to a posture of gratitude. If you're feeling a little lost, I hope the messages on the pages of this book will offer you an alternative perspective and remind you that there is still much to be thankful for.

Even in 2020.

I am most grateful for the 1,800 employees who work for Foundation Health Partners (FHP) at Fairbanks Memorial Hospital, Tanana Valley Clinic and Denali Center. We have all been challenged by the Covid-19 pandemic, but none more so than the employees of FHP. They have had to work harder than ever while taking adjustments to pay and benefits. Yet they continue to care for patients with smiles, caring hands and caring hearts. And they do this while exposing themselves more than others to the risk of contracting Covid-19. Thank you. You are all heroes indeed.

I am thankful to be able to do meaningful work that is valued by the community; for this wonderful community in such a beautiful setting; for my wife, family, and friends to comfort, entertain, and support one another; to be able to work alongside some of the finest individuals anywhere on earth; for the many privileges, freedoms, and comforts that I have; for my health; and, for the means to be able to serve and help those that are less fortunate.

I am grateful for my family and the blessings we have received. Through this pandemic our daughter found a job, our son got a promotion, and my husband and I have been busily working. When so many have lost work, we are grateful that all of us are gainfully employed and in good health – blessings that many wish they had right now.

As a travel agent my job has been hit hard, like so many other professions, but our clients have expressed to us how happy that we are riding it out with hope we all will travel again soon. To paraphrase 007: travel is only shaken; not stirred. For now the photo albums of past trips have been thumbed through many times this year: a reminder of good times and great travels. I'm thankful for those memories and look forward to making more soon!

There is nothing like a world pandemic to make you think about your life. At times I grieve for the people we did not see, the celebrations we did not attend, and the places we did not go. But then I feel incredibly grateful that we are financially secure and have wonderful friends

Perhaps the most interesting part of the experience is that life has slowed down a bit and we have connected virtually with people we do not often see or hear from. For example, my aunt's 100th birthday party celebration was held by Zoom with the happy result that first cousins and friends attended who would not have been at the in-person event. The happiest moments of 2020 have been when, instead of grieving for what we could not do, we focused on creatively thinking of new things to do and new ways to connect.

I look forward to being able to see people more in person, and I miss hugs, but 2020 has also had very rich moments of connection for which I am so very grateful.

The background of the entire page is a collage of various mechanical gauges, dials, and instruments. These include pressure gauges with 'P' markings, temperature gauges with numerical scales, and other precision instruments. The gauges are rendered in a light, semi-transparent style, creating a technical and industrial aesthetic. The text is presented in white boxes with black borders, set against this background.

I'm grateful for the opportunities I've been given. In 2020 I've been showered with very different opportunities than ever before - to grow in uncomfortable directions, to embrace a smaller existence, to make a competitive sport out of changing course, to ask for help more freely, to offer help more quickly, to renew dormant connections and to forge brand new ones, and to search for happiness in untraveled places without leaving the house.

I'm also quite grateful that the new normal means that people are much more likely to accept my random FaceTime calls without hesitation.

I am grateful for any and all employers that allow employees who are parents, especially with young children, to put their families first and careers second. I'm grateful for the patience, good nature and fundamental community ethic of so many of the people I encounter from day to day. I'm grateful for my workplace and industry. We've been able to safely keep people working during COVID, which allowed the Alaska Department of Transportation & Public Facilities to deliver over \$65M in construction projects around the Fairbanks area (over \$500M throughout Alaska). The vast majority of projects are constructed by local contractors with local residents. At a time when so many businesses have reduced revenue, are laying off staff, and many families are struggling to make ends meet, I'm grateful that we've been able to keep people working, improve safety and mobility with projects, and continue to be an economic driver for Alaska.

I am grateful and humbled by all those working in critical infrastructure jobs during this crisis. That includes those in the medical profession, public safety, military, statewide industry, grocery, hospitality, transportation, and more. It has reminded me of the importance of saying “thank you” every time I buy groceries, call for a medical appointment, go through TSA, or step on and off an airplane.

I am so grateful for all of the people in our community that pitch in and help out. We really are all on the same team and everyone that does whatever they can for whoever they can makes all the difference. Seemingly small gestures can have lasting impact - they tell others, “I care about you and want to help.” We all feel like it’s “me against the world” right now... thank you for reminding me that it’s US against the challenges we face.

I'm thankful for defining myself by WHY I do things rather than WHAT I do. When this thing called COVID hit (not sure if you're aware of it...) a bulk of my work involved travel, speaking, and facilitating at live events. That disappeared in a matter of days. Our team pivoted with purpose. We found new ways to bring our cause of creating a more inspired, safe and fulfilled world to life. Through live virtual events, a podcast and on demand online classes, among other things and more to come. Just last week I was able to conduct sessions in Germany, Grand Rapids, Michigan and North Bay, Ontario in a mere 24 hour period. I never could have done that before. That's pretty cool and I'm thankful for it.

I'm also SO thankful that 9 months into a pandemic, my family is together and doing as well as we can.

I'm grateful for a good cup of coffee. I start my day with coffee made by my loving partner, who, by the way, wakes up early each day to go to work so that he can be home early to provide care for our children in the afternoons. I'm grateful that I can be home in the mornings and work from home so that I can be available for my children. I'm grateful for virtual meetings. I may be alone on that one, but I'm grateful that video technology has allowed me to function in my role and work collaboratively with my team without missing a beat. I'm grateful for my team. I work with an amazing, inspiring, and driven team of professionals. I'm grateful for downtime. For me, this takes on many forms including exercise, sketching, gardening, and serving others. Sometimes, it means sleeping in on a Saturday. I'm grateful for my family, by blood and by choice. I'm grateful for Fairbanks. When I first arrived in Fairbanks, I thought it was a temporary stop on my journey. I've been here since 2006 and now my roots are firmly settled and nourished by everything that makes Fairbanks incredible.

I'm grateful for all the support from people at many levels who have stepped up to the plate from the beginning of this pandemic. What amazes me is how these amazing people found and shared their generosity and love. It is unfathomable to even begin to express my gratitude. There is a verbal expression of gratitude in my Yup'ik language that I heard growing up: QUYANA. It has been loosely translated as "thank you", but it's more than that. When expressed, the person saying this is extending gratitude from within his or her soul. I want to express that to all the health care providers, first responders, Dr. Fauci, Dr. Zink, Fairbanks Memorial Hospital, Yukon Kuskokwim Health Corporation, Norton Sound Health Corporation, Southcentral, Tanana Chiefs Conference, and MANY other health organizations state wide for their untiring support for all of us. The thing I am most grateful for during the COVID-19 pandemic is time spent with my two boys and husband at home. Usually, we are so busy with sports, school, etc, that we rarely slow down. I am thankful for the opportunity to spend time with them daily, and have them home under one roof since they both play competitive hockey. I can't wait for competition to resume—but in the meantime, I am cherishing every moment.

I am grateful for time.

Prior to 2020, for what seems like forever beforehand, time was about what you could stuff in it, how you could stretch it, what cheats you could come up with to save it.

We should work hard to not return to those ideals. The half a beat that we have wrestled back from life should (and for me shall) be savored. It should be defended with vigor. It is just a sliver of our humanity that we have been forced to regain, a moment that was to many at once unaffordable and priceless has been gifted to us. Cherish it.

This will pass, and what we have learned about life, our loved ones, and ourselves will fade if we allow it to. Remind yourself to take the time.

This year has felt like a much needed pause and a time of discovery with our kids.

We spent days making meals together and laughing around the table. We went on adventures in the woods and enjoyed the slow pace of life in our garden. We spent time in the living room reading good books, playing games and watching family movies. We had a lot of honest conversations, wrestled through issues of the heart and learned to love each other more intentionally.

It hasn't always been pretty or easy, but as I look back at all we did it feels like a treasure and I am so grateful that our schedules were cleared and we were able to invest this year in our home as we continue to learn what it means to be a family.

I'm a glass-half-full kind of person but even I have had to be more intentional in my gratitude this year. As I reflect on 2020 I can see that I have much to feel grateful for. There have been opportunities to develop and grow, and challenges to overcome and conquer. I have been able to explore new places and try new experiences. I have made new friends and connected more deeply with old friends. I have spent the most time with the people I hold most dear. My family has grown and so has my heart.
